

BENGER TRIBUNE

A Benger Solar Farm Update

Progress Made

After receiving a planning permit from Harvey Shire Council and the Southern Joint Development Assessment Panel in late 2019, we have since progressed the project to the next stage by commencing the grid connection process with relevant authorities, as well as undertaking geotechnical investigations to better understand the ground conditions of the site.

The team at South Energy would like to sincerely thank all the community members for providing their insights and sharing local knowledge with us. We are very honoured to be part of this lively community and look forward to strengthening our bonds.

South Energy will remain committed to continuing to work with everyone towards the delivery of the solar farm and so the community is encouraged and welcome to contact us should they have any questions or wish to know more about the projects.

What's Next

Following the preliminary geotechnical investigations, some other minor works may also be seen at the project site over the coming months to help inform the final design and management plan for Benger Solar Farm. The works will be undertaken completely within the project boundary.

Meanwhile, we will continue to working through the grid connection application process with Western Power for access to the existing 132 kV network, to ensure stability and security of the network in the long term.

These project is envisaged to commence construction in 2022 and be fully operational in 2023. Should the schedule be brought forward, we will make it known to the community ahead of any major works taking place.

Local Jobs & Businesses

At South Energy, we value the passion and the support received from the local community.

We are committed to utilising local resources where feasible, including labour and materials for the construction and operation of the project, with the view to develop the local skilled workforce and fostering community prosperity.

To help us understand the ranges of services that could be sourced in the local area, local contractors and suppliers are encouraged and always welcome to get in touch and register their interest with us by emailing: benger@southenergy.com.au

Community Initiative Program

South Energy has pledged our long-term support for the well-being of the local community that hosts our project via the Community Initiative Program.

The program will involve an annual funding commitment from the project that will be used to support local non-profits, non-government organisations and community-led projects that create long lasting social, environmental, and economic benefits for the local area.

Details about the program will be available at a subsequent stage as the project progresses towards construction and delivery.

Enquiries, Feedback & Complaints
